INTRODUCTION

Welcome to the 3rd edition of Dell & Price Queensland Steel Datestamps - Commonwealth Period.

This incorporates all the new information gathered since the 2nd edition in 2017. The number of additions/corrections is quite surprising and you will find these underlined throughout the work.

A work of this size would not be possible without the assistance of numerous contributors. In no particular order they include Tony Curtis (especially for the military section) David Hopper, Jenny Bennett, Simon Atyeo, Michael Dallwitz and numerous others. Thankyou all.

Most of the information on the opening and closing dates was obtained from Dr Joan Frews "The Post Offices & Receiving offices of Queensland" now out of print, but still a must for Queensland postmark collectors. Those for the telephone offices were obtained from the various Post Office guides in our possession and we feel that at least 95% of the known offices are listed. A few will be missing that opened post 1956 and some short term offices from before then.

Ratings are a guide only, but gives you an idea on the availability of the cancellations. The rating scale used in this listing is as below.

C - Common	S - Scarce	R - Rare
2R – Rarer	3R – Rarer still	4R – Rarest

Ratings are based on reviewing auction realisations over many years as well information provided by our contributors. It is also based on a "feel" for the post offices and a expectation of the particular postmark at that location. As a general rule the ratings given are on the conservative side as new discoveries are being constantly made.

We have decided to continue with making this book available as a free download from the Internet. Many thanks to the Toowoomba Stamp Club for once again allowing us to place this work on their website.

As there are still numerous blank spaces any help from readers in filling these gaps,along with changes to dates,corrections and additions would be greatly appreciated.

Please contact Terry Dell at 7 Maryann Street,Golden Beach QLD 4551 or email me at cookardinia@outlook.com.

Terry Dell
Co-editor
2026.

NOTES

MANUFACTURED “ARCHIVAL” MATERIAL

Over the last few years a significant number of Queensland postmarks have been marketed throughout Australia as “Archival” material. This is a very misleading term, as these strikes have no official status whatsoever, nor did they originate from any Archival collection, but were privately “manufactured” during the 1980’s.

In the general list, an (*) followed by a date indicate that this type and date is “manufactured”. No importance or historical significance should be attached to the dates of these strikes either, since many do not indicate dates of actual usage. It is also very doubtful if some were ever issued, or even exist, other than in these “Archival” strikes. A look through the alphabetical listing at the end of the book will reveal some very unusual dates.

Owing to the nature of their “manufacture”, and even though the original datestamps were used, they are not genuine postal products and we feel REFERENCE strikes would be a much more appropriate and accurate description of this material, and less likely to cause future litigation. Since none of it originated in the actual Post Offices concerned, we have given all this material a rating of (C) (common) only.

LOCATIONS

All the main localities used as reference points in the alphabetical list are shown on the UBD Queensland Map 470.

Where there are two or more listings with the same name, but entirely different locations, we have numbered them (1), (2) etc. Only those Offices open in the Commonwealth period are included. We see no point in numbering the same town every time it changed location or closed and reopened as a Post Office, as more times than not it remained open as a different class of office and used the same datestamp.

RECEIVING OFFICES

Where Receiving Offices have not had a datestamp and have used other means of canceling stamps, for example a manuscript cancel on the stamp or on the cover, or various form of rubber stamp, we have indicated this in the main list as well as a separate list in Part 2

TELEPHONE OFFICES.

We have obtained a book of “Post and Telegraph Offices” issued by the PMG in 1969. Any telephone office listed in this book as being open will have the listing changed to >1968. The remaining closing dates for the Telephone Offices shown as >1956. indicates that they were still open in 1956 and were closed before 1969. Later information is unavailable at this time. The years of the “Post Office Year Guides” we had available were 1910, 1915, 1918, 1921, 1924, 1927, 1930, 1935, 1940, 1946, 1950, 1953 and 1956. All Telephone Offices were issued with a datestamp and our listing is nearly complete.

THE FRAMED COMMONWEALTH TYPES

TYPE 1

These all have QUEENSLAND at the base

TYPE 2

These all have the town name at the base eg CAIRNS and were used for other functions such as REGISTRATION, POSTAGE PAID etc. The function of the Datestamp is across the top.

TYPE 3

These have BRISBANE followed by either QLD, Q or AUST at the base.

TYPE 4

These all have QLD at the base (sometimes followed by a dot)

TYPE 5

These all have QLD—AUST at the base

TYPE 6

These generally have QLD—"POSTCODE" at the base. For Postage paid types they can have AUST between QLD and the Postcode. This group also contains the Type 5's which have been modified by having the "POSTCODE" added either above or below the dateline.

THE SUB-TYPES

Unless followed by a (s) or s, all the datestamps have a Large Date Line (LDL) fitted. This was standard prior to the introduction of the small date rollers in about 1957. The vast majority of the new CDSs issued after 1957 had the small nylon rollers fitted (SDL) and many of the earlier LDLs were converted to SDL during the late 60s or early 70s. In the 1990's a few new CDSs were initially issued with LDLs.

LETTER (s)

This indicates the original LDL was replaced by a SDL.

LETTER s

This indicates that the CDS was initially issued with an SDL.

LETTER t

This indicates that time is included in the date line, whether standard or added later.

LETTER x

This indicates the removal of Codes or Post Codes, with a blank space left in place. It is then dropped when a new Code is added.

Paddington 5t

Paddington 5tx

Paddington 5tx(s)

QUEENSLAND STEEL DATESTAMP TYPES

COMMONWEALTH PERIOD

TYPE 1

Type 1

Type 1

TYPE 1t

Type 1

Type 1

A framed circle 25mm in diameter (or larger), with the Post Office name at the top, QUEENSLAND at the bottom. At the sides can be dots of varying sizes, dashes, arcs, blocks or nothing separating the top and bottom sections.

The date is in a single line across the centre, and comes in three distinct types:-

3 letter month – 2 figure year

2 letter month – 4 figure year

2 letter month – 2 figure year.

Type 1(s)

There are a small number of Type 1's that have a small date line (SDL) fitted.

Type 1t is similar layout to Type 1 but with the time included in the date line. The date line is contained within the name of the Post Office

Type 1t

A variant of Type 1t, is Type "1t Time Across". This was issued to larger offices with specific times for mail despatch. The date and time was in a single line across the centre extending to the outer framed circle

TYPE 2

Type 2(ii)p

Type 2r

Type 2u

Type 2eto

This type consists of a framed circle of varying diameters with the Post Office name across the bottom and the "Function" of the Datestamp across the top.

TYPE 3

Type 3at*1

Type 3bt

This type is primarily used in Brisbane and is similar to Type 2 but
 Type 3a with 'QLD' added after BRISBANE
 Type 3b with 'Q' added after BRISBANE

TYPE 4

Type 4

Type 4(s)

Type 4t

A framed circle, with the name at the top and QLD (sometimes followed by a dot) at the bottom, separated by arcs. The date is in a single line across the centre, which is usually a two letter month and a two figure year.

There are some Type 4s that have a small date line (SDL) fitted.

Type 4t is the same as the Type 4 but has the time included in the dateline.

Type 4etos

Type 4p

Type 4p

With the PAID types above there are examples where the amount paid is included in the dateline and other examples where the wheels are still installed but they are not used. These are both shown as Type 4p

TYPE 5

Type 5

Type 5(s)

Type 5s

Type 5s with Code 4

A framed circle, with the name at the top and QLD – AUST at the bottom usually separated by arcs. The date is a single line across the centre, which is usually a two letter month and a two figure year.

In many cases the large date line (LDL) has been replaced with a small date line (SDL) and these are recorded as Type 5(s).

Where a small date line is issued initially with the Datestamp this is recorded as Type 5s. This may also include a code number or letter (not an area code) either above or below the dateline.

Type 5t

Type 5t(s)

Type 5st

Type 5s(t)

Time is included in the dateline as part of the initial issuing of the Datestamp such as Types 5t and 5st. It can be added later to a Datestamp without time to give Type 5s(t). When the initial issue LDL is changed to an SDL then this is Type 5t(s)

Below are examples of Type 5 “functional” datestamps with their descriptor.

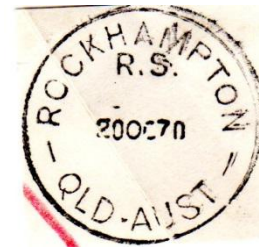

Type 5pst

Type 5ps

Type 5mos

Type 5rs(ii)

Type 5r(iii)

Type 5eto

Type 5pps

Type 5rs

TYPE 6

Type 6s

Type 6st

Type 6st

Type 6s

Type 6s is a Type 5s with the postcode added either above or below the dateline. Where the postcode is added with a SDL it is Type 6st.

Other Type 6s are a framed circle with the name at the top and QLD - 'POSTCODE' at the bottom separated by arcs. Time may be included in the dateline which is usually small (SDL) but later types have a large date line (LDL) fitted. This may also include a code number or letter (not an area code) either above or below the dateline.

Type 6

Type 6t

Below are examples of Type 6 "functional" datestamps with their descriptor.

Type 6ps

Type 6pst

Type 6rs(i)

Type 6etos

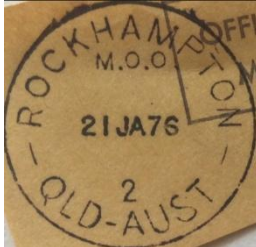

The type 6 PAID are usually in red ink, as for the Barcaldine example, they usually have QLD-AUST-'POSTCODE' across the base.

NOTES ON THE CONTENTS OF THE “COMMENTS”

As outlined above , various postmarks can have information above or below the dateline.

Where this information is above the dateline, eg postcode it is shown as “4680”.

Where this information is below the dateline, eg postcode it is shown as #4680#.

Eg for this postmark

The description in the comments would be:

“M.O.O” #2# QLD-AUST

Where the town name is missing, then it will be the same as shown at the top of the listing

Where the ‘&’ sign is used, it indicates the join between the text around the frame above and below the dateline. It is only used when there is nothing above and below the dateline

Eg for this postmark

The description in the comments would be:

POST DEPOT&ANNIERLEY Q

Where there is two lines of text, usually in the two line dates of the TPO postmarks, the new line is indicated by a ‘\’.

Eg for this postmark

The date line would be shown as MY3\83

For the PAID types 4 and 5, the detail around the frame, above the dateline is shown, where the detail around the frame below the dateline is not shown as it is assumed that it will be based on the type; QLD for type 4 and QLD-AUST for type 5

VICTORIA PARK in Gilchrist Ave. Brisbane

Post Office 21/2/45 – 29/6/46

--	--	--	--	--	--	--	--	--

RAAF BASE PO

Details Unknown

Unique type. 30mm circle divided by 2 horizontal lines. R B P / date/ B over A	4R	-1 JE 45		
--	----	----------	--	--

From the latter part of 1944 all RAAF Post Offices used a number instead of a name for identification, so it is possible Macrossan, Oakey and Victoria Park may never have had a type 5 cancel.

Brisbane Type 3u(i)

Brisbane Type 3u(ii)

Brisbane Type 3u(iii)

QUEENSLAND TRAVELLING POST OFFICES (TPO)

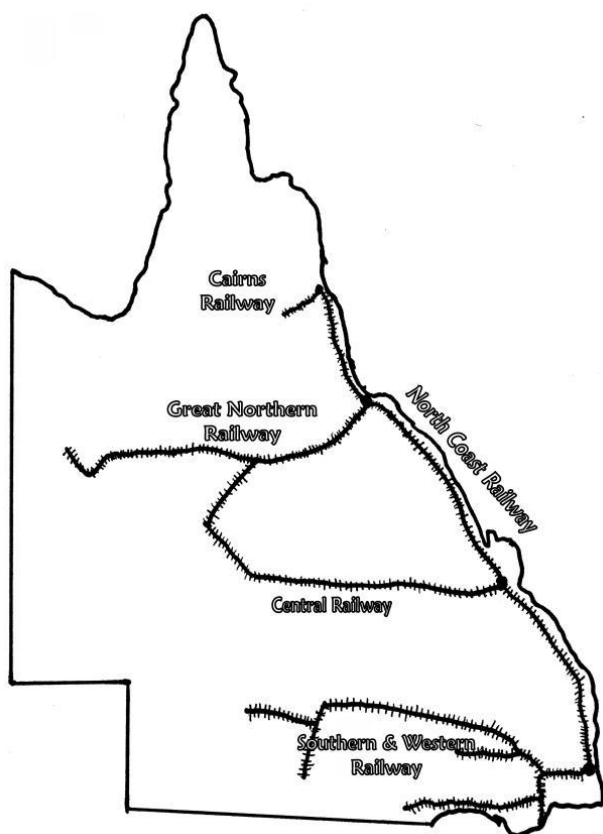

Travelling Post Offices: 1877 – 1932

The Travelling Post Offices (TPOs) and their cancellations do not fit into the pattern established for the postal markings listed elsewhere. For the TPOs the description of the types has been copied from Campbell (Queensland Postal History, 1990) because of general acceptance of his methods of describing these postal markings. Some of this material has also been taken from the web site created by Marius Wytenberg.

Rarity ratings have been developed using the comments of Campbell and by comparing these with the collection of David Hopper of Canada, incorporating the collections of Marius Wytenberg, Peter Iber (USA), and Ed Williams (USA).

Ratings are a guide only, but do provide an idea on the availability of the cancellations. The rating scale used in this listing is as below. Also note the additional comments on ratings in the main introduction.

C - Common
S - Scarce
R - Rare
2R - Rarer
3R - Rarer still
4R - Rarest

The figure illustrates the Queensland railway network with most of the lines illustrated. Generally lines ran inland from key ports and eventually they were linked up by the North Coast Railway.

Nomenclature specific to the TPO postmarks is defined below:
DIRECTION: UP or DOWN. UP is uphill away from the coast or Brisbane. Down is downhill towards the coast or Brisbane.
CODE: Letters that appear in the cancellation.
GANG: Numbers that appear in the cancellation that are not associated with the date or time.

QUEENSLAND STEEL DATESTAMPS – COMMONWEALTH PERIOD

TYPE	DIR	COMMENTS	DIA	CODE/GANG	R	ERD	LRD
